

BrightDrop Zevo The all purpose, all electric walk-in van

For your business

High productivity, low carbon footprint

- Powered by General Motors' Ultium Battery Platform
- Purpose-built electric van for last mile logistics
- Zero tailpipe emissions to help decarbonize your operations
- Built-in connectivity for native software integration

For your drivers

Driver safety, comfort and efficiency

- Advanced safety features to help keep your drivers alert and safe during their shifts
- Low step-in height to ease driver ingress and egress
- Large infotainment screens for a tech-enabled driving experience

For the planet

Take the first step toward a more sustainable future

- Keep up with the explosive growth of last mile delivery and services
- Scale your supply chain operations while helping to reach your sustainability goals
- Discover ways to more efficiently deliver goods and services utilizing the full BrightDrop ecosystem

For your drivers

CARPOOL LANE Access

- The California Department of Motor Vehicles (DMV) issues Clean Air Vehicle (CAV) decals that allow vehicles meeting specified emissions standards single occupancy use of High Occupancy Vehicle (HOV or carpool) lanes. CARB establishes the official list of eligible vehicles based upon vehicle emissions.
- Brightdrop is on the Official List of all qualifying vehicles.
- Carpool stickers are non-renewable.
